**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View
Navigation difficult in the extensive hill fog, this most widespread in the west and through the morning.

Forecast for Friday 01 Nov 2024
Weather: Some chance of a little brightness developing during the morning, but it will be a generally cloudy day with some patchy rain at first, which merges to longer periods of rain from early evening.

Maximum wind: West initially mean 15-20mph with gusts reaching 30mph across more exposed ridges and summits, easing light and variable from around mid-day.

Chance of cloud-free hill tops above 800m: 15% becoming 30% for a time around mid-day

Low cloud and visibility: Moderate or poor in rain, very poor within cloud with bases frequently down to 500m.

Temperature: **Valleys:** Plus 7 Celsius increasing 15 Celsius for the afternoon
At 800m: Plus 6 Celsius
Freezing level: Above summits
